INTRO

The Ossified Undead are creatures of bone and magic in human shape. Their legions march slowly and with terrible purpose, cutting down any who oppose them.

The Ossified Undead destroyed all life in their Plane in order to escape the influence of a mighty Plague Daemon, preserving their people as deathless constructs. When they discovered Tyria, they hoped to escape their lifeless plane, but were betrayed and banished back to their home. However, the Great Rift opened new portals to Tyria again, and now they are determined to avenge their betrayal and claim their new home by force.

BACKGROUND STORY

The native plane of the Ossified Undead was a verdant and tranquil place until the eye of the Plague God fell upon it. Under the malign influence of Plague, the world began to rot and wither. As the world around them fell into decay, the remaining Sages gathered to make a plan: they studied strange and dark magic that would allow them to transcend the weaknesses of flesh that the Havoc God preyed upon, and they would become beings of bone and spirit beyond death. Some rejected this, but many more were desperate enough to embrace the idea and become the Ossified Undead.

While those who rejected the Sages died out to disease and corruption, the Ossified Undead began to purge their lands of life. They drove back the Plague God's servants until their plane was saved, but no living thing remained. After this, the Ossified Undead lived in peace for a time. None are certain how long this was, as without life, time soon lost any meaning. Some fell into insanity or despair. The Sages were once more charged with seeking a solution.

The Sages' hopes were lifted when they discovered a Voidgate created by a strange sage from the plane of Tyria, who begged for help to protect his people. After some discussion, the Sages agreed to offer their knowledge, and in exchange, they asked for the right to settle in Tyria. While they provided their knowledge willingly, the Tyrians betrayed their side of the deal and severed their link with the Ossified Undead plane once the Havoc Wars were over.

The Ossified Undead and their Sages tried to reopen the link many times without success. Their opportunity only came when the Rift devastated Tyria, and they could take advantage of the sudden surge of energy that created the rift in order to open previously lost Voidgates throughout Tyria.

The Ossified Undead have begun to enter Tyria, returning once more to a land of life, but now view other factions with distrust, remembering their previous betrayal. Yet they are determined to make their home for their people in Tyria, even if they have to fight every other faction in Tyria to do it.

How will you carve out a new home in this plane of life?

SPECIAL RULES

Bane in Melee Aura: This model and up to 3 friendly units picked before the start of the game get Bane in melee. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.
Destructive: On unmodified results of 6 to hit, those hits get AP(+4).
No Retreat Aura: This model and up to 3 friendly units picked before the start of the game get No Retreat. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.

Ossified Boost Aura: This model and up to 3 friendly units picked before the start of the game get Ossified Boost. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.
Precise: Gets +1 to hit when attacking.
Precision Feat: Once per game, when this unit attacks and all its models have this rule, you may use this rule so that they get +2 to hit rolls.
Regeneration Aura: This model and up to 3 friendly units picked before the start of the game get Regeneration. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.

Spell Accumulator(X): Only one use per game. Gets X accumulator tokens at the start of each round, but can't hold more than 6 tokens at once. Casters from other friendly units within 12" may spend this model's accumulator tokens as if they were their own spell tokens.
Swift: This model may ignore the Slow rule.
Swift Aura: This model and up to 3 friendly units picked before the start of the game get Swift. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.
