INTRO

Eternal Wardens are massive magically imbued soldiers equipped with heavy battle armour and deadly weapons. Few in number, they rely on armour and skill in battle to overcome more numerous foes.

These powerful soldiers venture from the Voidgates of the Alabaster City to many Planes, including Tyria. They are famed for their diplomatic skill, heroic strength and hatred of Havoc. They recruit throughout the Planes, but only those who prove worthy learn the Wardens' true purpose: sacrificing souls to protect their Plane from a far greater danger. Of course, unworthy souls will still find purpose in defending their Plane, by other means.

BACKGROUND STORY

The Eternal Wardens hail from the Alabaster City, a bustling metropolis which stands in stark contrast to the ashen wasteland that makes up the rest of their realm. The city is a host to countless Voidgates that allow the Wardens to travel to countless Planes, including Tyria and many more beyond it. The largest Voidgate in the Alabaster City lies in its very heart, sealed by the Warden God who has dedicated his entire being to keeping the gate shut, stopping what lies beyond it from venturing in.

There is no one alive who still knows the full truth of what lies beyond the gate, except for fragments of legend and speculation. All that is known for certain is that their God has dedicated his entire purpose to ensuring that the Voidgate remains shut. This task has slowly drained the Warden God's power over the centuries, however, and the people of the city have long watched their God's strength slowly fail.

In order to preserve the Warden God, his followers sacrifice thousands of souls each day to lend him strength. His most devoted and skilled followers are inducted into the order of Eternal Wardens and imbued with a portion of their God's power. The Wardens venture out into several Planes to find worthy sacrifices, and either bring them to the Alabaster city alive, or capture their souls in lanterns to feed to their God.

During their travels, the Wardens discovered that a Havoc Daemon's soul contains a portion of their god's divine energy, and serves as a uniquely potent sacrifice for their own god. The Wardens started hunting Havoc Daemons through several Planes, eventually following the Havoc Gods to Tyria, arriving early in the Havoc Wars whilst pursuing the Havoc Gods. In Tyria, they helped win many battles, fighting alongside Tyrians and capturing many Daemons. When the Havoc Gods were sealed, the Eternal Wardens disappeared as suddenly as they came.

Now that the Great Rift has opened, and the Havoc Gods have been freed, the Wardens have returned to Tyria, viewing it as a hunting ground for capturing Daemons. However, they are now more careful fighting Daemons, not wishing them to be as badly defeated as they were, so as not to lose their source of souls. When necessary, they will even fight with other Tyrian factions, just to make sure that the Havoc Daemons are not driven to extinction.

How will you keep the gate sealed?

SPECIAL RULES

Bane when Shooting Aura: This model and up to 3 friendly units picked before the start of the game get Bane when shooting. If this model is killed, picked models that are deployed lose the rule.

Increased Shooting Range Buff: Once per activation, before attacking, pick up to 4 friendly units within 12", which gets +6" range when shooting once (next time the effect would apply).

Infiltrate: Counts as having Ambush, but may be deployed up to 1" away from enemy units.

Melee Slayer: This model's melee weapons get AP(+2) against units where most models have Tough(3) or higher.

Piercing Target(X): Once per game, during this model's activation, pick one enemy unit within 36" and in line of sight of it, and place X markers on it. Friendly units get +AP(X) when attacking it.

Re-Deployment: After all other units are deployed (including non-Ambush units that were set aside), you may remove up to two friendly units from the table and deploy them again. Players alternate in placing Re-Deployment units, starting with the player that activates next.

Repel Ambushers: Enemy units using Ambush must be set up over 12" away from this model's unit.

Smash: Ignores Regeneration, and against units where most models have Defense 5+ to Defense 6+, this weapon gets Blast(+3).

Stealth Aura: This model and up to 3 friendly units picked before the start of the game get Stealth. If this model is killed, picked models that are deployed lose the rule.

Unpredictable Fighter: When in melee, roll one die and apply one effect to all models with this rule: on a 1-3 they get AP(+1), and on a 4-6 they get +1 to hit rolls instead.

Unstoppable Shooting Mark: Once per activation, before attacking, pick up to 4 enemy units within 18", which friendly units gets Unstoppable when shooting against once (next time the effect would apply).

Unstoppable in Melee Aura: This model and up to 3 friendly units picked before the start of the game get Unstoppable in melee. If this model is killed, picked models that are deployed lose the rule.

Warden: When units where all models have this rule are shot or charged from over 9" away and take hits, those hits count as having AP(-1), to a min. of AP(0).

Warden Boost Aura: This model and up to 3 friendly units picked before the start of the game get Warden Boost. If this model is killed, picked models that are deployed lose the rule.
