INTRO

The Prime Brothers represent the pinnacle of gene science, a small number of super human individuals with advanced armour and weaponry, which rely on their skill and durability to achieve victory against any odds.

Prime Brothers are enhanced with the latest gene-mods, adapted from discoveries made after arriving in Sirius. The process that creates Prime Brothers gradually destroys the body, leaving them with significantly shortened lifespans. Despite this, many young soldiers still choose to become Prime Brothers, proudly dedicating their short lives to the Conduit and his cause.

BACKGROUND STORY

Battle Brothers were created by a visionary scientist, known as the Founder, who used a series of gene-mods in order to enhance soldiers beyond their human limits. The Battle Brothers were quickly deployed to maintain unity and peace over Earth and its nearby colonies. The gene-mods proved wildly successful and many sought to join their ranks.

When humanity arrived in Sirius, they encountered new challenges, as previously unknown phenomena, technology and threats were commonplace in Sirius. In order to adapt, the gene-mods of the Battle Brothers were experimented upon in order to further increase their capacities. The results of these experiments were soon rolled out and distributed to each Detachment, to allow them to train and equip these recruits to become Prime Brothers.

Once their training was completed, the Prime Brothers were formed into new Detachments and deployed to the Frontier. Rather than reinforcing the existing Battle Brothers forces, they were assigned to explore and fight far from the core of the galaxy.

Many Prime Brothers began to show damage to their muscles, joints and bones, as their bodies were unable to adapt to the gene-mods. These flaws were found in every Prime Brother, but for some the deterioration was much slower than others, with it taking decades for the worst effects to show in some, but until then, each Prime Brother remained a highly effective warrior.

The Prime Brothers carried on even after these side effects were discovered, however, despite the wishes of the Custodians, they revealed the side effects of their gene-mods publicly. Despite this, many recruits were still willing to accept the risks in order to join their ranks. Prime Brothers know their enhancements mean that they are more likely to die from deterioration than in battle, as a result many are willing to take risks others would deem unacceptable. This has only further built their reputation as heroes and drawn in more recruits who idolize them.

Due to their shortened life spans, Prime Brothers often lack the organization and personal experience of the Battle Brothers, so they rely on their advanced technology and individual heroism to overcome this disadvantage. While some Battle Brothers may view them as reckless, others have developed a keen respect for the bravery and sense of sacrifice common to the Prime Brothers.

How will your short lifetime serve the Founder's vision?
