INTRO

A highly developed empire in the centre of Tyria, the Human Empire's armies are made up of all sorts of infantry, cavalry, ranged units, and even some monstrous beasts. Their armies are highly varied but lack the specialisation of other factions.

Once a beacon of unity and stability, the Old Empire collapsed when its last two heirs fought each other to claim it for themselves. Now, the remaining cities must rebuild as they live in the shadow of their former glory. The new Human Empire is fragile, built on a coalition of guilds and nobility, and only time will tell whether this empire will endure.

BACKGROUND STORY

Humans spread throughout Tyria after they developed agriculture and metalworking. A number of cities arose which fought for political dominance until eventually one city came to dominate the region through conquest and alliances. This system of alliances and vassals became the basis of the Old Empire, where the Emperor ruled from the Capital city, supported by a council of Noble Houses. This Empire brought peace and trade to the Midlands, which in turn led to innovation and expansion until most Human settlements were united under their sway.

The Empire faced its greatest struggle during the Havoc Wars. On the eve of their greatest defeat, the Wizarding Guild and allied magicians turned the tide, sacrificing their lives to seal the Havoc Gods into the Orb of Fate. A period of peace and prosperity ensued, and the Orb and the Imperial Crown became symbols of peace and Imperial authority. Yet, the Emperors would never regain their previous authority as the Empire began to rely more on local rulers, held together by careful diplomacy and the personal charisma of successive Emperors. This era came to a sudden end with the opening of the Great Rift.

When the twin heirs of the last Emperor destroyed the Orb during a violent succession dispute, it unleashed the captured Havoc Gods, and the resulting release of arcane power destroyed much of Tyria. The Capital, Imperial Family, and much of the ruling class were destroyed almost instantaneously. A number of outlying provinces broke away, while towns and cities in the core of the Empire were left without leadership. The situation threatened to devolve into total chaos.

Local Merchants and Guilds stepped in to maintain order in many towns where the local rulers had died. These towns declared themselves Free Cities. Other towns fell under the sway of the Wizarding Guild, who were still held in high regard for their intervention during the Havoc Wars. Reluctantly, the Nobles recognised some cities as under the governance of various Guilds, including the Wizarding Guild. In others, the Guilds agreed to share power with the surviving nobility.

Together, these cities would form a new senate that would continue to govern what remained of the Human Empire. It was agreed a Steward would be elected to rule the Empire until the Orb was restored and a new Emperor could be named. Stewards are chosen from Noble Candidates or those with some trace of Imperial blood, who have renounced all other titles and loyalties except those to the Empire itself.

How will you reforge the Empire?

SPECIAL RULES

Bounding: When this unit is activated, you may place all models with this rule in it anywhere fully within D3+1" of their position.
Breath Attack: Once per activation, before attacking, roll one die. On a 2+ one enemy unit within 6" in line of sight takes 1 hit with Blast(3) and AP(1).
Caster Group: This model counts as having Caster(1).
Coordinate: At the end of this unit's activation, another friendly unit within 12" that hasn't activated yet may be activated immediately. May not be used if this unit was activated via Coordinate.
Defense Buff: Once per activation, before attacking, pick up to 4 nearest friendly units within 12", which gets +1 to defense rolls once (next time the effect would apply).
Extended Buff Range: If this unit is within 24" of another friendly unit with this rule that is within 6" of a friendly Hero, then that Hero may use special rules that allow it to pick friendly units within 12" (except for spells) on this unit as if it was in range.
Fortified: When units where all models have this rule take hits, those hits count as having AP(-1), to a min. of AP(0).
Fracture: Ignores Cover, and on unmodified results of 6 to hit, those hits get AP(+2).
Furious Buff: Once per activation, before attacking, pick up to 4 nearest friendly units within 12", which gets Furious once (next time the effect would apply).
Hold the Line: Units where all models have this rule get +1 to morale test rolls.
Hold the Line Boost Buff: Once per activation, before attacking, pick up to 4 nearest friendly units within 12", which gets Hold the Line Boost once (next time the effect would apply).
Increased Shooting Range Buff: Once per activation, before attacking, pick up to 4 nearest friendly units within 12", which gets +6" range when shooting once (next time the effect would apply).
Mend: Once per activation, pick one friendly model within 3" with Tough, and remove D3 wounds from it.
Precision Fighter Buff: Once per activation, before attacking, pick up to 4 nearest friendly units within 12", which gets +1 to hit rolls in melee once (next time the effect would apply).
Precision Fighting Mark: Once per activation, before attacking, pick up to 4 enemy units within 18", which friendly units get +1 to hit
