INTRO

The Alien Hives are a faction of aliens using biotechnology, and is made up of a variety of sub-species which come from the remote frontiers of the galaxy, striving to find their niche in Sirius.

When they first arrived, they were viewed as monstrous invaders, but after a long war of extermination, breakthroughs in communication lead to a fragile peace. Now, the Hives must come to terms with the legacy of the long war and decide how they are to adapt.

BACKGROUND STORY

Over the course of their evolution, the Alien Hives specialised into a number of different roles and environments. Despite this divergence, these sub-species gradually united into a strict caste system led by the apex predator of their world; the Hive Lord. Each caste became specialised in different roles, working together in harmony as their civilization grew.

With a lack of workable metals on their home world, their technology came to be based on psychic abilities and biochemistry, and this knowledge allowed them to adapt themselves and gradually alter native animals as well. The Alien Hives believed that these changes allowed them to exist in more perfect harmony with their world. Perhaps the strangest of these were the ones which came to be adapted for space travel. Alien Hives travel through the stars using massive creatures which they've bred for this purpose. These vessels travel from world to world, always requiring a great amount of atmosphere and nutrition for them to store before travelling between the stars. These ships are homes to crews who maintain them, some of whom never step off the ships on which they were born.

After travelling through a swathe of the Frontier, the Alien Hives reached the Sirius Sector. Their arrival set off a series of conflicts with the factions in Sirius, as communication proved difficult and the Alien Hives were assumed to be hostile due to their alien appearance and nature. They soon were locked into a war of extermination with the various species of Sirius, which only concluded when the DAOU managed to communicate with one of their Hive Lords. While it took time to come to true understanding, this opened a path to peace between the species of Sirius and the Hive.

Peace provided its own challenges for the Alien Hives, as they soon found themselves confronted with a number of alien ideas and values that challenged the structure of their society. They strive to stand on equal footing with the other Species in the Sirius Sector, ensuring their migratory routes are protected and defending their claims to various worlds in the sector, by force if necessary. Some in the lower castes have begun demanding new rights, undermining the harmonious working of the castes while certain Hive Lords have rejected peace entirely, fearing that the corrupting influence of outsiders might ultimately destroy their way of life completely.

How will your Hive adapt?

SPECIAL RULES

Agile: Moves +1" when using Advance, and +2" when using Rush/Charge.
Caster Group: This model counts as having Caster(1).
Furious Aura: This model and up to 3 friendly units picked before the start of the game get Furious. If this model is killed, picked models that are deployed lose the rule.
Hive Bond: Units where all models have this rule get +1 to morale test rolls.
Hive Bond Boost Aura: This model and up to 3 friendly units picked before the start of the game get Hive Bond Boost. If this model is killed, picked models that are deployed lose the rule.
Increased Shooting Range Aura: This model and up to 3 friendly units picked before the start of the game get +6" range when shooting. If this model is killed, picked models that are deployed lose the rule.
No Retreat: Whenever a unit where most models have this rule fails a morale test that causes it to be Shaken or Routed, the test counts as passed instead. Then, roll as many dice as the number of wounds it would take to check for wound effects (must always roll at least 1 die), and for each result of 1-3 the unit takes one wound, which can't be ignored.
Piercing Growth: Place one marker on this unit at the beginning of each round, starting on the round after which it deployed (counting start of game deployment as deploying on the first round). For each marker models with this rule in it get AP(+1) (up to a max. of +2). If this unit is ever Shaken, it loses all its markers.
Precise: Gets +1 to hit when attacking.
Rapid Charge Aura: This model and up to 3 friendly units picked before the start of the game moves +4" when using Charge actions. If this model is killed, picked models that are deployed lose the rule.
Resistance: When a unit where all models have this rule takes wounds, roll one die for each. On a 6+ it is ignored. If the wounds were from a spell, then they are ignored on a 2+ instead.
Rupture: Ignores Regeneration, and on unmodified results of 6 to hit that aren't blocked, this weapon deals 1 extra wound.
Self-Destruct(X): If this model is killed in melee, the attacking unit takes X hits. If this model survives melee, after both sides have finished attacking, it is immediately killed, and the enemy unit takes X hits.
Shielded Aura: This model and up to 3 friendly units picked before the start of the game get Shielded. If this model is killed, picked models that are deployed lose the rule.
Spell Conduit: Casters within 12" that are from other friendly units may cast spells as if they were in this model's position, and get +1 to casting rolls when doing so.
Stealth Buff: Once per activation, before attacking, pick up to 4 friendly units within 12", which gets Stealth once (next time the effect would apply).
