## INTRO

Halflings are short Humans, smaller than your typical Dwarf. They lack the heavy weaponry of some species, instead relying on inventive uses of technology, animals, and pacts made with spirits and golems.

After facing many perils, they are a people torn between two lives that now struggle to reconcile them. They were driven from their idyllic farmland homes by marauding Giants, and after generations of conflict and struggle, they have made their way back to their ancient homeland. Yet now, many Halflings find themselves at odds with their old traditions, preferring instead to pursue their ancient grudge against the Giants.

## BACKGROUND STORY

Halflings originally resided north of the Western Steppe, where their clans built villages and farmed in peace for many centuries. This changed when Giants appeared, marauding through their homeland. The Giants ate any livestock, grain, and Halflings they encountered along the way, taking little note of any resistance the villages could muster. Without any means to defend themselves, the Halflings evacuated their homelands, fleeing through a hidden Voidgate. They hoped to return once the danger had passed, only to discover that the Giants had destroyed the gate, preventing them from returning home.

The Halfings arrived in a land of rocky hills and bogs, ill suited to the sort of farming that had once been their way of life. They grew what little the land would allow them, farming mushrooms and resilient plants, while hunting and fishing to make up the rest. They struggled to survive during these difficult times, and many died of starvation and cold.

The Halflings encountered Havoc's influence in the North before most, and without anywhere left to escape to, the Halflings fought to defend their new home, adapting their old farming equipment and animals to war. Their army proved versatile and adaptable, despite their ragtag appearance. While many Halflings would die during the war, those who survived became skilled warriors, specialising in combat against larger foes.

Once the Havoc Wars ended, many Halfling veterans decided to go south and seek revenge on the Giants. They marched through the lands which Havoc had destroyed until they arrived in their old homeland. The tribe of Giants who had destroyed their home had long moved on and perhaps even died out, but the Halflings still sought out and fought with any other Giants that they could find. Secure in their old homeland, the veteran Halflings rebuilt the old Voidgate. The eldest Halfling recognised their ruined homes, but few still wished to return. Most Halflings now remain in their new Northern home, only returning to their home countries in order to hunt Giants.

The return of Havoc gives the Halflings another ancestral foe to prove themselves against. Many Halfling clans still hold grudges for ancestors killed during the Havoc Wars and are eager to prove their skills against them.

How will you settle your ancestral grudges?

## SPECIAL RULES

**Bash:** Ignores Cover, and against units where most models have Defense 5+ to Defense 6+, this weapon gets Blast(+3).
**Bounding:** When this unit is activated, you may place all models with this rule in it anywhere fully within D3+1" of their position.
**Crossing Barrage(X):** Once per activation, when this model moves through enemy units, pick one of them and roll X dice. For each 4+ it takes 3 hits with AP(1).
**Good Fighter:** This model gets +1 to hit rolls in melee.
**Heavy Impact:** This model's Impact hits get AP(1).
**Lucky:** When attacking, unmodified results of 6 to hit deal 1 extra hit (only the original hit counts as a 6 for special rules).
**Lucky Boost Aura:** This model and up to 3 friendly units picked before the start of the game get Lucky Boost. If this model is killed, picked models that are deployed lose the rule.
**Melee Evasion:** Enemies get -1 to hit rolls in melee when attacking units where all models have this rule.
**Melee Slayer:** This model's melee weapons get AP(+2) against units where most models have Tough(3) or higher.
**Morale Debuff:** Once per activation, before attacking, pick up to 4 enemy units within 18", which gets -1 to morale test rolls once (next time the effect would apply).
**Precision Fighter Aura:** This model and up to 3 friendly units picked before the start of the game get +1 to hit rolls in melee. If this model is killed, picked models that are deployed lose the rule.
**Regeneration Aura:** This model and up to 3 friendly units picked before the start of the game get Regeneration. If this model is killed, picked models that are deployed lose the rule.
**Rending when Shooting Aura:** This model and up to 3 friendly units picked before the start of the game get Rending when shooting. If this model is killed, picked models that are deployed lose the rule.
**Surprise Attack(X):** Counts as having Infiltrate. Once deployed via this rule, roll X dice, for each 4+ one enemy unit within 3" takes 2 hits with AP(1).
**Swift:** This model may ignore the Slow rule.
**Takedown Strike:** Once per game, when this model attacks in melee, you may pick one model in the unit as its target, and make one attack at Quality 2+ with AP(2) and Deadly(3), which is resolved as if it's a unit of 1.
**Teleport Aura:** This model and up to 3 friendly units picked before the start of the game get Teleport. If this model is killed, picked models that are deployed lose the rule.
**Vengeance:** When this unit is fully destroyed, place as many Vengeance markers on the unit that destroyed it as models with this rule in this unit at the beginning of the game. Friendly units get +X to hit rolls with their weapons when attacking that unit, where X is the number of markers on it.
