INTRO

The Human Inquisition is a secret organization of investigators, psychics, assassins, fanatics, and other misfits dedicated to protecting humanity in Sirius. The Human Inquisition tends to fight alongside other forces, deploying highly trained specialists to achieve their mysterious goals.

Originally, the inquisition was established as diplomatic contacts and investigators within the scattered human colonies of Sirius. They came to rely on secrecy, vigilantism, and other underhanded methods, in order to gather information and neutralize threats. Their dubious reputation has made them pariahs to some, but the Inquisition continues to carry out their work of protecting humanity.

BACKGROUND STORY

The rise of a messianic figure known to history as the Founder resulted in a devastating war that soon engulfed Earth and its colonies. As the war grew more devastating, many survivors began to seek a means to escape. A desperate group of refugees commandeered the Founder's own flagship in order to escape the conflict, leading a fleet of like-minded survivors. They were pursued by the Founder's forces until they were lost and scattered by the sudden appearance of a wormhole which brought them to Sirius.

The Blessed Sisters formed shortly after humanity arrived in Sirius, hoping to aid the human colonies and resist the followers of the Conduit. However, the Sisters themselves spent most of their time training and living in monastic isolation. To remedy this, they began to send out investigators and envoys to gather intelligence, and learn how the Sisters could best aid their allies. These individuals came to be known as the Inquisition, working to uncover threats and call on the help of the Sisters when needed.

Whilst these investigators sought to help humanity, many human colonies were wary of these groups, and tried to isolate them. The Inquisition began to hire their own agents, operating in secret, using bribery, and building hidden alliances to carry out their objectives. They used their connections to carry out secretive occult and scientific research to discover more about the Sirius Sector, as well as other threads like the Havoc Gods.

The Blessed Sisters eventually discovered the extent of their Inquisition's hidden influence and conspiracies, and denounced this as overreach, fearing that they might lose the trust of the very colonies that they sought to protect. The Inquisition refused to disband however, claiming they had only done what was necessary. Instead, they severed their official connections with the Sisters and began to train their own agents, including specialized assassins, to deal with high level threats instead of relying on the Sisters.

The Inquisition maintains hidden ties within a number of human factions, even amongst the Battle Brothers who they had once been formed to oppose. Their unchecked zealousness has caused problems due to false leads or misplaced suspicions, but has also been vital revealing a number of troubling threats, such as the Infected scourge, Havoc worshipers, and Soul-Snatcher cults.

How will you protect humanity from the shadows?

SPECIAL RULES

Bounding Aura: This model and up to 3 friendly units picked before the start of the game get Bounding. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.
Brutal Fighter: When in melee, unmodified results of 6 to hit deal 1 extra hit (only the original hit counts as a 6 for special rules).
Casting Debuff: Only one use per game. Once per activation, before attacking, pick up to 4 enemy units within 18" with Caster, which gets -1 to casting rolls once (next time the effect would apply).
Delayed Action: Once per round, if your opponent has more units left to activate than you, then this model's unit may pass its turn instead of activating (may still be activated later).
Evasive: Enemies get -1 to hit rolls when attacking units where all models have this rule.
Fortified: When units where all models have this rule take hits, those hits count as having AP(-1), to a min. of AP(0).
Hit & Run: Units where all models have this rule may move by up to 3" after shooting or being in melee.
Inquisitorial Agent: Once per game, if all models in this unit have this rule, it may be activated even if it had already activated this round (stops being fatigued when activated for the second time). Only up to half of the units in the army with this rule at the beginning of the game (rounding up) may use it in a single round.
Precision Fighter Aura: This model and up to 3 friendly units picked before the start of the game get +1 to hit rolls in melee. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.
Precision Shooter Aura: This model and up to 3 friendly units picked before the start of the game get +1 to hit rolls when shooting. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.
Protected: When a unit where all models have this rule takes wounds, roll one die for each. On a 6+ it is ignored.
Repel Ambushers: Enemy units using Ambush must be set up over 12" away from this model's unit.
Resistance: When a unit where all models have this rule takes wounds, roll one die for each. On a 6+ it is ignored. If the wounds were from a spell, then they are ignored on a 2+ instead.
Resistance Aura: This model and up to 3 friendly units picked before the start of the game get Resistance. If this model is killed, picked models that are deployed lose the rule. This effect lasts until the first wave of reinforcements is deployed.
Spell Accumulator(X): Only one use per game. Gets X accumulator tokens at the start of each round, but can't hold more than 6 tokens at once. Casters from other friendly units within 12" may spend this model's accumulator tokens as if they were their own spell tokens.
Surprise Attack(X): Only one use per game. Counts as having Infiltrate. Once deployed via this rule, roll X dice, for each 4+ one enemy unit within 3" takes 2 hits with AP(1).
Teleport: Once per activation, before attacking, place this model anywhere fully within 6" of its position.
